of the world that surrounds us. It may be that design thinking in this area returns to existential visions and processes, transferring needs and desires to the difficult ground of mediation and compatibility between different cultures, religions, ethnicities and visions of the world, which have now become the cosmopolitan web on which the most advanced societies are built. Can design defined as Italian withstand these epochal events? The pictures used to illustrate this article are taken from *ADI INDEX*, a yearbook that brings together the best products of

Italian design produced each year. A report by the Osservatorio Permanente del Design (Permanent Design Observatory), comprised of a group of experts working throughout Italy, which draws up the shortlist for the *Compasso d'Oro* awards, presented every three years by an international panel. Important and praiseworthy work that continues *ADI's* long-term commitment to support Italian design, but which, perhaps due to the changing times as observed above, could require a substantial change in formula.
